

MARIANA LIZETTE TOVAR SALAVAR

BUSINESS INTELLIGENCE & DATA ANALYST JR. | SOFTWARE ENGINEERING

+52 81 2325 5640 | salazarmariana210@gmail.com | Monterrey, Nuevo León.

PROFESSIONAL PROFILE

Recently graduated in Software Engineering from UANL, passionate about data analysis and generating insights that drive business decision-making. Experienced in Business Intelligence, data visualization, web development, and STEM education, combining technical skills with strategic understanding. Interested in transforming data into actionable information, optimizing processes, and adding value through data-driven solutions. Looking to grow in junior roles in Business Intelligence, Data Analytics, or Data Science with a business focus.

LANGUAGES

- Spanish (Native) | English (C1)

Data Science & Artificial Intelligence: Machine Learning (Supervised & Unsupervised) · NLP · Exploratory Data Analysis (EDA) · Descriptive & Inferential Statistics

PROFESSIONAL EXPERIENCE

Business Intelligence Intern – Whirlpool Corporation

Aug 2025 – Aug 2026

- Developed dashboards in Looker Studio to monitor commercial KPIs and support decision-making across commercial and growth teams.
- Built and maintained data pipelines using Google Cloud Platform (BigQuery, SQL, Python), improving data availability and reliability. Optimized queries in BigQuery, reducing processing times and improving report efficiency.
- Analyzed commercial and operational data to identify trends and actionable insights for the business.
- Collaborated with stakeholders to translate business requirements into data solutions and communicate findings clearly.

Technology Instructor – Tecnolochicas Program

Nov 2023 - Dec 2024

Televisa Foundation

- Taught web development, robotics, mobile app development, and artificial intelligence classes to middle and high school students, inspiring them to pursue STEM fields.
- Promoted gender equity in technology, impacting more than 250 students in one year.

Presidenta del Grupo Estudiantil de Ingeniería en Tecnología de Software Jul 2023 - Jun 2025

- Led a student group focused on the academic, professional, and social development of Software Engineering students.
- Coordinated academic events, conferences, workshops, and tech fairs.
