ABOUT ME

Student in training currently in my 8th semester in the Software Technology Engineer degree at the Universidad Autónoma de Nuevo León, with experience in teaching technology, especially in web programming, mobile development and robotics for girls and adolescents, promoting gender equality in STEM areas.

I stand out for my commitment to continuous learning, taking courses and certifications to stay up to date on the latest technological trends.

I have skills in leadership, teamwork and time management, acquired through my experience as president of a student group. I am oriented to generate impact and add value in each project in which I participate.

LANGUAGES

- Spanish (Native)
- English (B2)

COURSES

Data Science

November 2024 - February 2025 [Bedu]

Business English

August 2024 [Santander Academy]

Introduction to Artificial Intelligence

June 2024 [Fundación Televisa, Microsoft]

Introduction to Robotics

August 2024 [Fundación Televisa, Microsoft]

App Development

December 2023 [Fundación Televisa, Microsoft]

HTML and CSS for Beginners

December 2023 [Fundación Televisa, Microsoft]

Frontend by Tecnolochicas Pro

December 2023 [Fundación Televisa, Microsoft]

EXPERIENCE

Technology Facilitator – Tecnolochicas Program

Televisa Foundation | January 2023 – December 2023

- I taught web development, robotics, mobile app development, and artificial intelligence classes to middle and high school girls, inspiring them to become interested in STEM areas.
- I promoted gender equity in technology, impacting more than 250 students in one year.
- Certified to teach the courses "HTML and CSS for Beginners", "App Development", "Introduction to Robotics" and "Introduction to Artificial Intelligence".

President of the Software Technology Engineering Student Group

July 2023 - Present

- I lead a student group made up of students, promoting academic, professional, and social development in the university community.
- I plan, coordinate, and execute academic events, such as conferences, workshops, and technology fairs.
- I develop strategies to strengthen the sense of belonging and motivate members, achieving an increase in the active participation of members.

SKILLS

- Use of Microsoft Office (Excel, PowerPoint, Word)
- Power BI
- Power Apps
- Figma
- JavaScript
- C, C++ language
- HTML
- CSS
- Figma
- Mongo DB (Mongo Atlas)
- SQL (Grouping, joins, subqueries, views)
- Python (Pandas, analysis, data transformation)
- Statistics and Visualization (Exploration, distributions, correlations, regression, multivariate analysis)
- Machine Learning (Supervised/unsupervised classification, natural language processing)

SOFT SKILLS

- Leadership
- Organization and time management
- Social skills and teamwork
- Proactivity and continuous learning
- Problem solving
- Effective communication
